three tables giving figures for the planned imports of non-ferrous metals into East Germany in 1957.

Table I gives the original plan, the revised plan, and the countries of origin for the import of metal ingots.

Table II gives the same information for rolled metal products.

Table III gives the 1957 plan and the countries of origin for the import of metals.

Comments:

1. The revised plan was to go into effect 3 January 1957, but the figures given for planned imports from the various countries of origin have not yet been adjusted in accordance with the revisions made. It is intended that adjustments be proportional in each case.
2. In comparison to previous years, an effort has been made to include as many countries of origin as possible for each metal. This appears to be a deliberate policy resulting from serious hold-ups due to late delivery by individual countries in the past.
